HUMAN RESOURCES & COMPANY POLICIES

Employee Onboarding Guide & First-Week Playbook

Apex Global Technologies Inc. — Systems Provisioning, Orientation Roadmap, and Milestones

Effective Date: January 1, 2026 **Version:** 4.0 **Classification:** Confidential — Internal **Owner:** People Operations & Talent Development

1. Welcome to the Team

Congratulations on joining Apex Global Technologies! Our onboarding framework is structured around the **30-60-90 Day Success Pathway**, designed to provide the tools, context, and support necessary to transition smoothly into your role and deliver meaningful impact.

2. Pre-Boarding Phase (T-minus 14 to Day 0)

Before your first day, People Operations and IT Desktop Engineering coordinate several critical milestones:

- **Background Screening & Documentation:** Completion of background checks, digital offer acceptance, and direct deposit details via the pre-boarding portal.
- **Hardware Selection:** Choice of standard engineering workstation (Apple MacBook Pro 16" M3 Max 36GB RAM or Lenovo ThinkPad P1 Gen 6 Linux/Windows) submitted 10 days prior to start.
- **Welcome Package & Onboarding Buddy Assignment:** Receipt of the Apex welcome box, corporate swag, and an introductory email from your assigned Onboarding Buddy.

3. Day 1: Arrival, Orientation, and Hardware Provisioning

Time Schedule	Session Name	Key Deliverables & Action Items
09:00 – 10:00	**Arrival & Badge Issuance**	Report to Corporate Reception (Building B). Security badge issuance, biometric door access setup, and workspace orientation.
10:00 – 11:30	**People Ops Orientation**	Form I-9 verification, benefits enrollment overview, review of Employee Handbook, Code of Conduct, and Leave Policy.
11:30 – 13:00	**IT Provisioning Lab**	Laptop handoff, Okta SSO setup, YubiKey FIDO2 hardware token registration, initial password configuration, and GlobalProtect VPN validation.
13:00 – 14:15	**Welcome Team Lunch**	Lunch hosted by your Engineering Manager and Onboarding Buddy at the company dining facility.
14:15 – 17:00	**Workspace & Comms Setup**	Configure Slack channels (`#announcements`, `#eng-all`, `#team-[name]`), set up Google Workspace, and verify Jira/ GitHub credentials.

4. First-Week Day-by-Day Milestone Checklist

> **First Week In-Office Attendance Requirement**
>
> Reminder: As detailed in the Remote Work Policy, all new hires must be on-site at the corporate office for their entire first week (Monday through Friday) to complete hands-on provisioning, pairing, and compliance verification.

Day	Core Focus Area	Required Completion Checklist
Day 1 (Mon)	Identity, Hardware & Accounts	I-9 verified; Okta SSO active; YubiKey enrolled; Laptop configured; Slack introduction posted.
Day 2 (Tue)	Compliance & Development Setup	Complete mandatory Security Awareness & Phishing module; install Homebrew, Python 3.11, Docker, and IDE; generate SSH/GPG keys.
Day 3 (Wed)	Architecture Deep Dive & Repo Clone	Clone primary service repos; execute local build and test suites; attend first team morning standup; review system architecture docs.
Day 4 (Thu)	First Commit & Buddy Pairing	Pair programming with Onboarding Buddy; pick up first "good-first-issue" starter ticket; open draft Pull Request adhering to Git standards.
Day 5 (Fri)	Sprint Retrospective & 30-Day OKRs	PR reviewed and merged to staging; 1:1 check-in with Manager to finalize 30-60-90 day goals; team Friday afternoon wind-down.

5. 30-60-90 Day Milestone Expectations

- **First 30 Days (Assimilation):** Master team workflows, understand deployment pipelines, resolve 3-5 minor bug tickets or feature tasks, complete all compliance training modules.
- **First 60 Days (Independence):** Own feature tasks from design to staging deployment, participate in code reviews for peers, shadow an engineer during an on-call rotation.
- **First 90 Days (Full Velocity):** Independent contribution to critical architectural sprints, participate in production releases, enter the regular team on-call rotation, formal 90-day review.
